

Symposia presentations guidelines

Each symposium is allocated a time slot of **90 minutes sharp**. Symposium chairs are free to organize the times of the talks as preferred but are asked to strictly observe the schedule of their session to allow attendees to switch between sessions. We advise to include 5-10 minutes introduction at the beginning of the symposium to allow participants to arrive from other sessions/rooms without missing on the first talk, and to keep the last 10-15 minutes free for Q&A and/or general discussion. Symposium chairs will be in charge of the time keeping and in moderating the Q&A. We advise to be in the lecture hall approx. 5 min before your session starts to set things up. We kindly ask the symposium chairs to inform the other contributors about how to prepare their presentations.

PC computers for PowerPoint (Microsoft Office version 2016) or PDF presentations are available as part of each lecture halls' presentation system; the 16:9 layout format is supported. **We strongly advise you to use these PCs.**

If you really cannot avoid using your personal device, note that only standard HDMI connection can be guaranteed on site (VGA or other connection types will not be possible): if you have special technical requirements, you need to bring your own adapters. Make sure ahead of time that you can connect your device appropriately and that all presentations play correctly!

Instructions for uploading supporting material

We have organized a **cloud repository** where presenters can upload their presentations at their earliest convenience, but not later than **1 h before the session starts**. Staff members from the local organizing committee will support you in downloading them to the local PC.

To upload your presentation:

1. Identify your talk in the list below
2. Add the respective **prefix** before your file name → e.g. [S01_124_mytitle.pptx](#)
3. Click on the upload link of your session (internet connection required)
4. Drop your file in the repository
5. Make sure that below the drop box, a message of successful upload appears

Notes:

- These are **only upload** link. Therefore, we recommend uploading only the final version of your presentation since you will not be able to modify it later
- If you need to edit or update a presentation that has been already uploaded, simply upload the updated version making sure to name the file as specified → e.g. [S01_124_mytitle_v2.pptx](#)
- Other relevant files for the presentation (e.g. videos) can be uploaded to the drop folder. Please, name them with the same prefix of the talk and upload them in an organized way to keep the drop folder neat and tidy → e.g. [S01_124_video01.mp4](#)
- If altogether you need to upload **large files** (i.e. presentations + files > 150 MB) please contact us.

If you have issues or questions, contact us at escan2022.psychologie@univie.ac.at

Day/Time	Sess-ID	Title	Prefix Filename	Upload Link
WED 10.00	S01-124	My inner feelings vs. yours: the role of interoception on the “me-not me” distinction	S01-124_	https://ucloud.univie.ac.at/index.php/s/KBwa5m9WRIdCL0x
